

# Information Notice for the Call for Tenders - Catering Service Delegation

The French School of Dar Es Salaam will soon launch a call for tenders for the delegation of catering services for its two campuses.

## Current Context

Currently, two catering providers share the management of our two campuses. The invoicing of meals to parents is centralized and managed by the school.

## New Objectives of the Call for Tenders

On the occasion of this call for tenders, several changes will be introduced in the management of the catering service:

1. **One provider:** A single provider will be selected to manage the catering service for both campuses.
2. **Dematerialized billing and counting:** The management of meal billing to parents will be transferred to the selected provider. The provider will have to set up a dematerialized system for counting and billing meals, for example via magnetic cards. This system should also allow for the precise counting of the number of meals served each day.

## Additional Information

The catering service will need to meet the needs of approximately 450 students (from kindergarten to high school) and 50 adults (teachers, staff, agents, administrators, visitors).

## Objective of the Notice

The objective of this notice is to allow interested candidates to anticipate and prepare a response taking into account the new requirements. Candidates are invited to propose innovative and effective solutions to meet these changes.

We thank you for your interest in our institution and look forward to receiving your proposals.

Best regards,

The French School of Dar Es Salaam
